## Technical fault at Airservices Brisbane Centre

Aircraft are being delayed this afternoon due to a technical fault at our main air traffic control centre in Brisbane.

This is impacting flights in and out of Brisbane Airport, Sydney Airport and a number of regional Queensland airports.

The fault has been identified and is currently being rectified.

Safety is our number one priority.

We are working collaboratively with the airlines to minimise disruption.

We apologise to the travelling public for any inconvenience.

We will provide further updates when able.
